

**Practical guide**  
**ICHEC Summer School in**  
**Regenerative Innovation**

**24 June – 12 July 2019**

**Belgium (Brussels)**

Sponsored by

## **OUR MISSION**

“We are currently preparing students for jobs and technologies that don't yet exist, in order to solve problems that we don't even know are problems yet”

A transformational experience to completely shift their belief system. A highly interactive program for students to become actors of change for themselves and the world.

## **A PROGRAM AROUND 3 PILLARS**

### **New Business**

We want to inspire students towards a new vision of society around new “regenerative” economic models: circular, local, collaborative, functional and bio-inspired economies will be studied thoroughly with various experts and cases.

### **21<sup>st</sup> century skills**

We also want to provide students with the 21<sup>st</sup> century skills defined by the OECD to evolve in tomorrow's world: creativity & innovation, critical thinking & problem solving, communication & collaboration, leadership & responsibility.

### **Self direction**

We also believe it is key to empower students with a sense of initiative and self-direction, by working on personal motivations and core values, but also through exercises such as mindfulness meditation and yoga.

## LEARNING APPROACH

We strongly believe that theory and concepts can only be understood and transformed into knowledge through experimentation. We thus designed our learning path around an experiential pattern in 4 steps.

### Discover

They will discover the main concepts through a video before each class, take a quiz and access non-mandatory readings to dive deeper

### Reflect

In class, social entrepreneurs, CEO's and leaders will share their experience and inspire students with real-life stories

### Conceptualize

Expert teachers and academics will answer questions and ensure a thorough understanding of the content of the course

### Experiment

Mini-hackathons, business games, peer groups and other activities will help ground their learnings and empower them

## **EXPECTED OUTCOMES**

Our aim is to create a community of students ready to act as real changemakers into the world.

### **INSPIRED**

Above all, we want to inspire students by changing the way they look at business and society

### **FAITHFUL**

We also want them to gain the skills, confidence and direction to be prepared for tomorrow's world

### **GROUNDING**

We finally hope to make them feel competent and supported in a lifelong learning journey

---

## General Information
